CAREER OBJECTIVE

I am a Master of Information Technology student with hands-on experience in Python, machine learning, and full-stack web development. I build data-driven applications from scratch — handling messy, incomplete datasets, designing structured transformation pipelines, and deploying interactive web interfaces. I am comfortable navigating ambiguity, identifying patterns in incomplete data, and building AI-powered tools that create meaningful user experiences. I am eager to contribute to projects that combine intelligent data systems with practical business outcomes.

EDUCATION

- **La Trobe University** 2026–Present
Master of Information Technology Melbourne, Australia
- **KL University** 2021–2025
Bachelor of Technology in Computer Science and Engineering Hons. CGPA: 9.12
- **Sri Chaitanya Jr. College** 2019–2021
Board of Intermediate Education, Andhra Pradesh Percentage: 82

PERSONAL PROJECTS

- **Breast Cancer Detection — Data Quality & ML Pipeline**
End-to-end data assessment, transformation, and classification on a real-world medical dataset.
 - Assessed the UCI Breast Cancer Wisconsin dataset for data quality issues including missing values, class imbalance, and inconsistent feature scales — mirroring the challenges of legacy data migration.
 - Designed a structured data transformation pipeline: feature engineering, imputation, scaling, and train-test splitting using Pandas, NumPy, and Scikit-learn, mapping raw diagnostic records to a clean model-ready schema.
 - Trained and evaluated Random Forest and Logistic Regression classifiers, achieving **97%+ classification accuracy**. Applied confusion matrix analysis and cross-validation to validate pipeline integrity end-to-end.
- **Stock Market Price Analysis and Prediction**
Multi-source data pipeline with ML forecasting and interactive web dashboard.
 - Built a structured ETL-style data pipeline ingesting live financial data from Yahoo Finance API alongside news feeds, performing normalisation, feature extraction, and transformation before feeding Prophet and Random Forest models.
 - Integrated news sentiment analysis with TextBlob to enrich structured price data with unstructured text signals — demonstrating experience combining heterogeneous data sources.
 - Deployed an interactive Streamlit web application with live price visualisation and forecasting outputs, providing a conversational browsing experience for users to explore stock trends.
- **StegaVault: Secure Data Hiding in Images**
Cryptographic application combining encryption, steganography, and anomaly detection.
 - Developed a steganography application in Python and Streamlit to embed encrypted messages and files inside image data using LSB encoding and Fernet (AES-128) military-grade encryption.
 - Built a hidden data detection module providing real-time heatmap visualisation of encoded regions — demonstrating experience with data validation and anomaly detection within a structured encoding scheme.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, JavaScript, C, SQL

AI & ML: PyTorch, HuggingFace Transformers, Scikit-learn, Prophet, TextBlob, NLTK, Pandas, NumPy

Conversational AI: Prompt engineering, intent classification, knowledge structuring, LLM integration

Web & Frameworks: React, Django, Flask, Streamlit, Spring, Hibernate

Cloud Technologies: AWS (Cloud Practitioner), Google Cloud (Associate Cloud Engineer), Docker

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Developer Tools: VS Code, PyCharm, GitHub, Postman, Docker, Obsidian

Version Control: Git, GitHub, Bitbucket

Soft Skills: Communication, Problem Solving, Adaptability, Attention to Detail, Teamwork, Leadership

Coursework: Machine Learning, UX Design, Database Management, Computer Networks, Data Structures and Algorithms, Software Verification and Validation, Cloud Computing, Operating Systems

Areas of Interest: Artificial Intelligence, Conversational AI, Data Engineering, Machine Learning, Software Development, Cloud Computing

CERTIFICATIONS

- | | |
|--|----------------------|
| • AWS Cloud Practitioner CLF-C01 | <i>July 13, 2023</i> |
| • Red Hat Certified Enterprise Application Developer | <i>Aug 10, 2023</i> |
| • Google Cloud Certified Associate Cloud Engineer | <i>Mar 30, 2024</i> |
| • Aviatrix Certified Engineer — Multicloud Network Associate | <i>July 02, 2024</i> |
